Review the following ten statements, and identify those which are false. For the false statements, restate each such that they become true.

- 1. With a decentralized style, the top leaders make and direct most important decisions.
- 2. For cost centers, "cost overruns" are expected if they are coupled with commensurate gains in revenue and profitability.
- 3. One simple expression of ROI is operating Income divided by average assets.
- 4. Common fixed costs support the operations of more than one unit.
- 5. The static budget responds to changes in activity.
- 6. Achievable standards are realistically within reach, and take into account normal spoilage and inefficiency.
- 7. The materials quantity variance compares the standard quantity of materials that should have been used to the actual quantity of materials used.
- 8. The labor rate variance is equal to the difference between the standard rate and actual rate, multiplied times the standard hours worked.
- 9. Variance analysis for overhead is split between variances related to variable overhead and variances related to fixed overhead.
- 10. Although a balanced scorecard approach may include target thresholds that should be met, the primary focus is on improvement.
